

# Build Stronger Communities

## With Carousel & Bluum

Clear communication starts with Carousel Digital Signage. We create software that empowers people to create and consume visual information within their organization. Deliver urgent, location specific communications to your municipality with Carousel.

# The Secret To Success

How municipalities, both big and small, stay connected with their citizens.

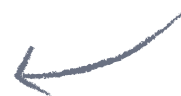

Carousel Digital Signage is a powerful communications tool that helps keep your community connected. From the DMV to police stations, city halls and across libraries, keeping your city connected across all government locations creates a more confident, unified community.

## Modernize Government Communications

One of the greatest challenges within local government is how to effectively communicate to the public in a way that keeps them informed, engaged and connected. Digital signage, once a novel, high-cost option, has evolved to become one of the most effective tools in the toolkit to help municipalities and local government services bring information to the public.

# The Network Effect

Cast an even wider net to further connect the people who serve your community.

Start with signage in City Hall and branch out from there creating a network effect. A spiderweb of shared information that helps tell a consistent story along with location specific information. Cast a wider net and bridge the gap. Connect people who serve your community along with the people who live in it.

# Carousel in Government

Connect people who serve your community  
along with the people who live in it.

## Connect

Stay connected with your citizens. Effectively communicate to the public in a way that keeps them informed, engaged and safe.

## Engage

Be sure visitors feel welcomed into your community. Use Carousel to display maps, guides, and directional information for your facility.

## Retain

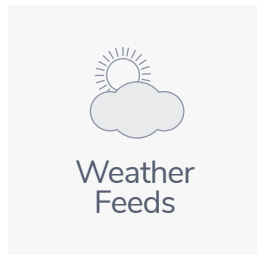

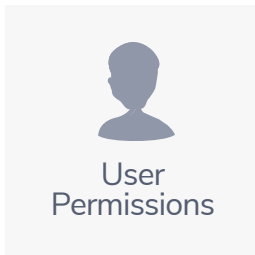

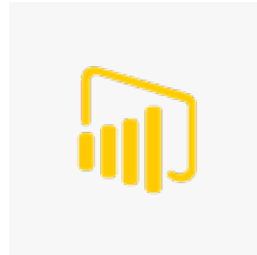

There are challenges when engaging with front line teams. Be sure employees feel recognized and supported with clear communication.
