

SONY

3LCD Laser Projector

Why Sony?

Sony is a major professional in the world of imaging technology, across both consumer and professional applications.

Sony's comprehensive imaging technologies extend across a wide range: lenses, image sensors, image processors, IP transmission, display devices and light sources. Products are developed by engineers with deep and broad experience in imaging technologies.

As a leading global manufacturer for professional users, Sony offers superlative moviemaking and broadcasting, as well as medical equipment and business and educational products.

Image quality

Sony's BrightEra™ 3LCD panel works with Sony's original Z-Phosphor™ light source to deliver unmatched clarity, color reproduction and smooth gradation.

Sony's 'Reality Creation' engine delivers ultra-high accuracy by combining database-driven, super-resolution processing with image pattern classification. Automatic control of both super-resolution processing and noise reduction ensures stunning image quality, smooth gradations and low noise.

Intelligent setting

Intelligent Settings offer four presets, optimising brightness, cooling system and other projector settings to suit all usage environments.

In addition, VPL-FHZ131L, VPL-FHZ101L, VPL-FHZ91L, VPL-PHZ60, and VPL-PHZ50 are equipped with an Advanced Intelligent Setting function, which automatically control the temperature of the installation environment, frequency of usage, and several other parameters so that they can be used at suitable settings for long-term stable operation.

Simple and discreet

The projector's minimalist design looks great in any space, blending seamlessly into the background of conference rooms, museums, and other sophisticated locations.

An experienced team of designers have created a functional, aesthetically pleasing product that is durable, easy to set up, and easy to use.
