

# SHIELD<sup>SM</sup> Protection Program Plans

## Enhanced Protection for Laptops and Professional Chromebooks

With the recent implementation of remote and hybrid working environments, thousands of devices are now in transit between work and homes. This is driving an increase in accidental damage to devices. Combine that with a national laptop shortage and technology departments are suddenly under an immense amount of pressure to keep working devices in circulation. What they need is a SHIELD<sup>SM</sup>.

The SHIELD<sup>SM</sup> Protection Program offers one of the best coverage plans in the industry. SHIELD<sup>SM</sup> acts as an extension of the original manufacturer (OEM) warranty and includes accidental damage protection. Bluum Technology coordinates all repair services on behalf of the purchaser for devices covered under the original OEM warranty. This provides convenience and peace of mind for tech and IT teams who are already busy with multiple demands for their time.
