

Transform Your School's Theater Productions

Lead with Innovation

Revolutionize the way you produce school plays, making them more immersive, versatile, and engaging for both students and audiences alike.

Elevate Your Productions

Imagine being able to transport your audience to any place, time, or world with the click of a button. With Epson's advanced projection and high-quality images you can create dynamic backdrops for your productions, eliminating the limitations and expenses of traditional physical sets.

A STEM Project in Disguise

Integrating projectors into your theater productions offers a unique opportunity for a cross-curricular STEM project. Students can get hands-on experience with cutting-edge technology, learning about the science behind projection, the art of visual storytelling, and the engineering required to seamlessly integrate digital backdrops into live performances.

Versatility at Your Fingertips

The true beauty of using these projectors lies in their versatility. With digital backdrops, you can change scenes from a bustling city street to a serene countryside in an instant, providing an unparalleled theater experience that captivates your audience's imagination.

Innovate and Inspire

By embracing projector technology, your school can position itself as a leader in educational innovation. Not only will your productions stand out, but you'll also be providing students with a rich, multidisciplinary learning experience that prepares them for the future.

Bring the World into Your Classroom by Creating Immersive Experiences

Wouldn't it be amazing if every classroom could become a gateway to new worlds where learning is not just absorbed but experienced? Together, Bluum and Epson are redefining educational spaces to captivate, inspire, and support every student's journey.

Lead the Way in Educational Innovation

There is a growing need for mental wellness support in schools, so we're introducing a new way to create calming and serene spaces with projection. These tranquil environments offer students a safe space to decompress, promoting mental well-being while ensuring the continuity of learning for others.

A Canvas for Every Subject

Every subject benefits from the added depth and context that immersive projection provides. Visualize complex scientific concepts in stunning detail, bring historical events to life, or showcase artistic masterpieces in their full glory.

Explore Beyond the Classroom Walls

With Epson's state-of-the-art projection technology, the world becomes your classroom. Take your students on a journey through the Amazon rainforest, explore the ancient ruins of Rome, or dive into the depths of the ocean—all without leaving the classroom.

A Collaborative, Cross-Curricular Project

Students can be involved in selecting the content, designing the visuals, and even programming interactive elements. This hands-on experience not only deepens their learning but also equips them with valuable skills in research, teamwork, and digital literacy.

Illuminate Learning with Epson's Advanced Projectors

Epson offers a full suite of high-performance projectors designed for virtually any large-venue application each with innovative advanced 3-chip projection technology, interchangeable lenses, extraordinary image quality and incredible brightness. These projectors provide unparalleled brightness, color accuracy and detail. Transform any venue into an immersive experience!

There are so many options when it comes to choosing the right projectors, let us help you find the right solution for your environment!
